

### **Lesson 3: Around the World Species Report and Classroom Book**

Many students come from different countries or states. Have the students choose a species native to their country or state to research and write a report. Students can access a list of threatened or endangered species in North America and the other six continents on [www.kidsplanet.org](http://www.kidsplanet.org) under “get the facts” . If the students are native to the United States, ask them to choose a species native to the state they were born in and one that was not previously done in the activity above. Allow the students to be as creative as they want. Allow two weeks for the students to work on this activity at home. When students are finished with the reports and presentations, add these reports to your class book described above or create a new class book for continued learning.
